SAFETY & PRIVACY

Introduction to the theme

apricot

Module Aims

- to discuss the topic of security and privacy on the Internet
- to recognise the dangers of the internet
- to learn how these dangers can be avoided or reduced

What will you learn?

- the difference between security and privacy;
- the technical measures available to protect yourself on the internet;
; how to search the internet safely
- how to recognise and avoid dangers on the Internet;
- how to navigate social media safely and protect your personal data
- how to deal with personal attacks and cyberbullying.

Understanding security and privacy

- people surf the internet on a daily basis
- the number of Internet users ^[1] in Europe in 2018 was around 727.6 million
- internet use^[1] for project partners in percentage of the population:

United Kingdom	95%
Germany	92%
Spain	86%
Lithuania	80%

But how safe are the users moving on the Internet?

^[1]Internet World Stats

Difference between privacy and security

- Privacy is the ability to protect
 - sensitive information,
 - personally identifiable information.

SECURITY

PRIVACY

- ❓ Read privacy statements before sharing personal information
- ❓ Security measures against viruses, malware and phishing

Sharing of information

- on social media
- cell phone data
- loyalty retail cards
- credit cards
- iWallets
- transport services
- ...

Protect personal information

The Internet never forgets!

Protect personal information

Every user can fall victim to crime on the Internet.

Without exception!

Measures can be easily taken

Security measures and protection options

- What are the technical possibilities?
- How do I surf the internet safely?
- How do I protect my personal data?
- How do I protect myself on social media networks?
- How do I cope with personal attacks and cyberbullying?
- How can I recognize dangers and avoid them?
